SUMMARY

Final-year B.Tech Computer Science student with strong knowledge of data structures, algorithms, and object-oriented programming. Practical experience in frontend development using HTML, CSS, JavaScript, and React. Eager to contribute to software development teams and grow as a full-stack engineer.

EDUCATION

B.Tech, Computer Science Engineering
VIT Bhopal University, Bhopal, Madhya Pradesh

2022-2026
CGPA: 8.41

TECHNICAL SKILLS

Programming: Proficient in Java, JavaScript, TypeScript

Frameworks and Tools: ReactJS, NextJS, Tailwind CSS, Excel, PowerPoint

Platforms: VS Code, Eclipse IDE, PyCharm, Jupyter Notebook, Git

Additional Skills: Data Structures and Algorithms, OOPs, Computer Networks, DBMS, Operating Systems

EXPERIENCE

Omdena Local Chapter Challenge — *Research Lead* 

Jan 2024-Mar 2024

- Led a 6-week project leveraging Machine Learning (ML) and Computer Vision techniques to analyze brain scan images for early detection and diagnosis of Alzheimer's disease.
- Collaborated with cross-functional teams to develop and refine ML models, resulting in impactful insights for healthcare diagnostics.
- Gained hands-on experience in cutting-edge technologies and their application to real-world problems

PROJECTS

IndieVibe – Fashion and Appointment Web Platform 

Feb 2025 - May 2025

- Built a full-stack fashion and appointment booking platform featuring gender-specific boutique listings, wishlist functionality, and secure authentication using NextAuth.
- Designed a responsive UI with Tailwind CSS and implemented dynamic routing, protected routes, and API integration with MongoDB.
- Added modular React components such as sliders, booking pages, and reusable session management wrappers to ensure scalability and maintainability.

Be My Vision 

Nov 2024 - April 2025

- Collaborated on the development of an AI-powered assistive system using YOLOv8 and FastAPI to help visually impaired users perceive their surroundings through real-time object detection.
- Contributed to integrating large language models and Google Text-to-Speech to generate and vocalize natural scene descriptions for improved accessibility.
- Worked as a team to design a scalable backend architecture for real-time camera input processing, object recognition, and distance estimation.

CERTIFICATIONS

- The Bits and Bytes of Computer Networking – Google
- Generative AI – GUVI
- Cyber Security Analyst – IBM
- Devops fundamentals – IBM
- Cloud Computing - NPTEL

ACHIEVEMENTS

- Selected among top 11 teams nationally in the ZS Associates Campus Beats Challenge 2025.
- Awarded the Reliance Foundation Undergraduate Scholarship.
